What is a Carpool?

A carpool is two or more commuters who share the ride to and from work or college in their personal vehicles. Commuters either share the driving or, if a commuter does not have a vehicle, provide gas money to the commuter that drives.

- Commuters in a carpool can be spouses, relatives, neighbors, coworkers or students, or even individuals who meet through RideFinders.
- There is no minimum number of days that commuters are required to carpool – RideFinders asks that commuters just carpool as often as they can.
